TESTIMONIAL FOR TRYDAN ELECTRICAL

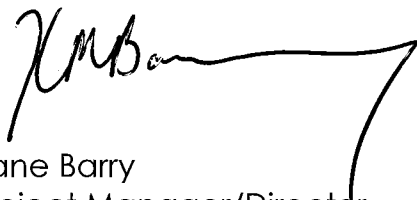

Humphries Construction have been using the services of Trydan Electrical since Mike established this business back in February of 2013. We have always found Mike and his team to be honest, reliable, efficient and professional in all aspects of his trade when working on our residential and commercial projects.

We have found Trydan Electrical to be competitive with their pricing and will do their best to meet our requirements, demonstrating their flexibility to ensure they exceed our expectations to help meet (at times) tight deadlines.

Communication is key in the construction industry especially when working with a number of sub contractors and Mike has proven to be no exception here.

We would have no hesitation in recommending Trydan Electrical to anyone that requires their services.

Kind regards

Kane Barry
Project Manager/Director
Humphries Construction
